Saturday	<p>Did you know that whisky develops its color and flavor from the cask its aged in? Before that, it's colorless!</p> <p>Texas Crown Club Whisky is aged in real American Oak Bourbon barrels, giving it a deep amber color, and smooth flavors which include vanilla.</p> <p>Over the course of the 4 years that our whisky ages, it extracts about 3 lbs of sugar from the wood which reacts to the lignin in the cell wall of the oak. This darkens the color, and produces vanillin and vanillic acid, which, you guessed it, taste like vanilla!</p> <p>Enjoy our expertly crafted whisky neat or on the rocks!</p>	<p>Did you know that whisky develops its color and flavor from the cask its aged in?
