Tuesday 03/23	<p>Did you know that between 60 and 67 degrees is the ideal temperature for sleep? 🌙💤 This is because your core body temperature drops to a lower level. Too warm, and it'll interfere with your body's natural melatonin production, making it harder to fall and stay asleep.</p> <p>With our touchscreen Smart thermostat that you can control with your smartphone, you can set your ideal sleep temperature routine automatically! 📱</p> <p>Visit the link in our bio to learn more about our innovative HVAC tech!</p>	<p>Did you know that between 60 and 67 degrees is the ideal temperature for sleep? 🌙💤 This is because your core body temperature drops to a lower level.
